

This practice is built exactly like the real test — same questions, same order, different numbers. Work every problem, then check the worked key. Anything you miss is exactly what to study.

1. Write a numerical expression that represents six less than the difference of 24.5 and 7. DO NOT EVALUATE.

2. Evaluate the expression from problem 1.

3. The table shows the prices at the Cardinal concession stand. At Friday's game the Ruiz family bought 3 pretzels, 2 hot dogs, and 4 waters. Write and evaluate a numerical expression for the total cost.

Item	Price
Pretzel	\$2.50
Hot dog	\$3.75
Water	\$1.25

4. Which expression represents each verbal expression? Write the letter. One choice is never used.

- Ⓐ $5m - 2$
- Ⓑ $2 - 5m$
- Ⓒ $5(2 - m)$
- Ⓓ $2 - (5 + m)$
- Ⓔ $5m + 2$

- a. the product of 5 and m, subtracted from 2 _____
- b. five times the difference of 2 and m _____
- c. two less than the product of 5 and m _____
- d. 2 decreased by the sum of 5 and m _____

5. Evaluate $3(a + b)^2 \div 4 + 2c$, if $a = 1$, $b = 3$, $c = 7$.

6. The table shows how much Priya earns working at summer camp. Write an algebraic expression for her earnings for leading a archery sessions and c canoe sessions. Then find her earnings if she leads 6 archery sessions and 3 canoe sessions.

Job	Pay
Leading an archery session	\$12.00 each
Leading a canoe session	\$15.00 each

Algebra 1 – Module 1 Practice Test

Full Name: _____

Period: _____

- 7.** Name the property that makes each statement true.

a. $2 \cdot (7 \cdot y) = (2 \cdot 7) \cdot y$

b. $r \cdot 1 = r$

- 8.** Simplify: $10c + 7 - 6c - 2$

- 9.** Simplify: $6(2x + 5) - 4x$

- 10.** Simplify: $9p - 5(p - 4)$

- 11.** Error Analysis — Rex used the Distributive Property on $-7(3x + 4)$ and wrote $-21x + 28$. Identify his mistake, then show the correct result.

- 12.** A rectangular parking lot has width w yards, and its length is $4w - 2$ yards. Write a simplified expression for its perimeter. Then find the perimeter if $w = 3$.

- 13.** Write an algebraic expression for the verbal expression: seven more than one-third of k .

Cumulative Review — ACT Style. Circle the best answer. No work required, but scratch work never hurts.

- 14.** $5/8 + 1/6 = ?$

(A) $6/14$
(B) $19/24$
(C) $5/48$
(D) $3/4$

- 15.** 60% of 45 is what number?

(E) 20
(F) 25
(G) 27
(H) 30

- 16.** $-6 - (-9) + 4 = ?$

(A) -11
(B) 7
(C) -1
(D) 19
