

Geometry 2.2 — Homework Answers

Odd-numbered exercises. Check your work against these; bring questions on the evens to class.

1. 16 (double each time)
3. Sample: a non-rectangular parallelogram (or trapezoid).
5. odd
7. Deductive — logic applied to a general rule (Law of Detachment).
9. Invalid — the conclusion being true does not prove the hypothesis (a sphere or ellipse also has no vertices).
