

Geometry 6.3 — Homework Answers

Odd-numbered exercises. Check your work against these; bring questions on the evens to class.

1. a median joins a vertex to the MIDPOINT of the opposite side; an altitude is the PERPENDICULAR segment from a vertex to the line containing the opposite side
3. $BP = 30$
5. $(2, 2)$
7. at the vertex of the right angle
9. the right angle is at $(0, 0)$, and the two legs are themselves altitudes, so the orthocenter is $(0, 0)$
