

Geometry 9.6 — Homework Answers

Odd-numbered exercises. Check your work against these; bring questions on the evens to class.

1. hypotenuse $\sqrt{64 + 225} = 17$; angles $\tan^{-1}(8/15) \approx 28.1^\circ$ and 61.9°
3. legs $24 \sin 41^\circ \approx 15.7$ and $24 \cos 41^\circ \approx 18.1$; other angle 49°
5. $\tan^{-1}(19/28) \approx 34.2^\circ$
7. the inverse ratios — $\sin^{-1}$, $\cos^{-1}$, $\tan^{-1}$
9. subtract from 90° — the acute angles are complementary
