

Name: _____

In the diagram, $c \parallel d$. Find each angle measure and name the relationship you used.

1. $m\angle 1 = 124^\circ$. Find $m\angle 5$.
2. $m\angle 3 = 68^\circ$. Find $m\angle 5$.
3. $m\angle 4 = 105^\circ$. Find $m\angle 6$.
4. $m\angle 2 = 57^\circ$. Find $m\angle 8$.
5. $m\angle 6 = 133^\circ$. Find $m\angle 3$.

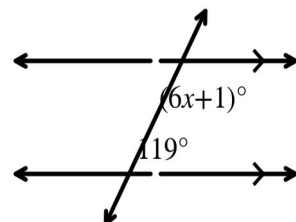

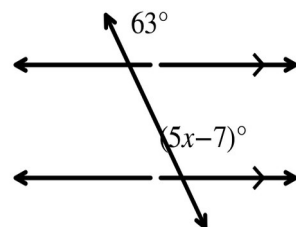

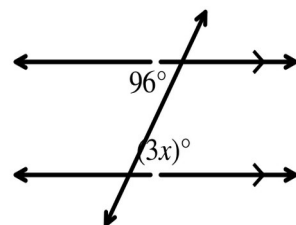

Each pair of lines is parallel. Find the value of x .

6. (figure a)

7. (figure b)

8. (figure c)

Answer each question.

9. Two parallel streets are crossed by a straight diagonal path. One of the consecutive interior angles measures 118° . Find the measure of the other consecutive interior angle.
10. A classmate says: "If two lines are cut by a transversal and one pair of corresponding angles is congruent, then EVERY pair of corresponding angles is congruent." Is the classmate correct? Explain.
