

Color by Solution — Module 2 Review (2.1 - 2.6)

Solve the 35 equations on the next pages. Each answer has a color — find the region with that number and color it. An absolute value equation can have TWO solutions; both are in the key and they share a color. Proportions: cross products. NO SOLUTION and IDENTITY (true for every x) each have their own color.

Name: _____ Period: _____

$x = -3$ or 12 BLACK	$x = 0$ WHITE (leave it)	$x = 5$ or -5 YELLOW	$x = 8$ or -2 ORANGE	$x = 2$ BLUE	$x = -1$ RED
$x = 10$ GRAY	$x = 4$ or -4 LIGHT GRAY	$x = -6$ GREEN	NO SOLUTION SKY BLUE	IDENTITY PURPLE	

Solve. Show your work in the box, circle the answer, then color the region with that number.
