

- 3.** Plane N with line k intersecting it, but not lying in it

G H GH = _____	T U TU = _____	Congruent? _____
--	---	---

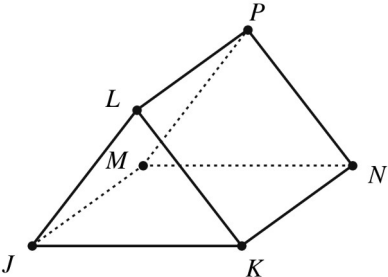

The figure consists of three panels, each showing a line segment with endpoints marked by black dots. The panels are separated by vertical lines.

- Left Panel:** A line segment sloping downwards from left to right.
- Middle Panel:** A vertical line segment.
- Right Panel:** A line segment sloping upwards from left to right.

Part 4 – Construct segment XY so that $XY = 2(VW)$. Compass and straightedge only.

 Given	Construct here:
--	----------------------------

Part 5 – Shade each plane on the prism. Use a different color for each, and fill in the key.

	plane JKL – blue plane MNP – pink plane KLPN – green	Which two of the three shaded planes never intersect, no matter how far they extend? _____
--	---	---
