Algebra 1 – Module 3 Test PRACTICE Full Name: _____

Module 3 — Relations and Functions Period: _____ _____ / 30

Answer each question, making sure to show your work in the space provided. Take the time to check your work. Write neatly. Circle your final answer.

1. Vocabulary. Write the letter of the term that matches each description. One term is never used. (4)

A) function
B) domain
C) relative minimum
D) continuous function
E) x-intercept

a. _____ the set of all x-values (inputs) of a relation

b. _____ the point where a graph crosses the x-axis

c. _____ a point that is lower than all the nearby points on a graph

d. _____ a function that can be graphed with a line or a smooth curve

2. State the domain and range of the relation {(1, −6), (−5, 2), (3, 2), (0, 9)}. (2)

D = _____

R = _____

3. Identify the independent and dependent variables: "The more miles you drive, the more gas you use." (2)

independent: _____

dependent: _____

4. Is the function discrete or continuous? Explain: the number of cars in a parking lot, counted each hour. (2)

5. Is the relation a function? Explain. {(3, 1), (−2, 4), (3, 6), (0, −1)} (2)

6. $f(x) = 5x - 3$. Find $f(2) + f(-1)$. (2)

7. Sam earns $g(x) = 10.25x$ dollars for babysitting x hours. Find $g(4)$. Then explain what it means. (2)

8. Is each function linear or nonlinear? Explain how you know. (2)

a) $y = 3x + 2x - 8$

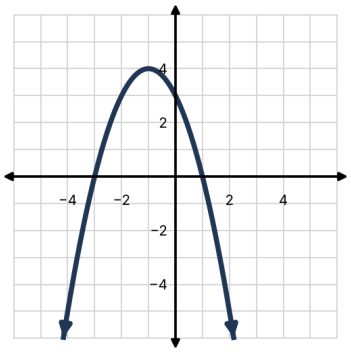

b) $y = x^2 + 4x$

9. Find the x- and y-intercepts of $4x - 3y = 12$. (2)

x-int: _____ y-int: _____

Algebra 1 – Module 3 Test PRACTICE Name: _____ Period: _____

Use the graph of f(x) for questions 10 – 11.

10. Name the x- and y-intercepts. Then describe where f(x) is positive and where it is negative. (2)

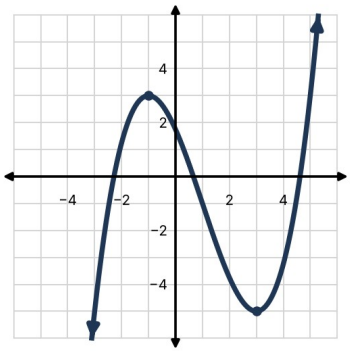

x-int: _____ y-int: _____

positive: _____

negative: _____

11. Name the line of symmetry. Then describe the end behavior. (2)

Use the graph of g(x) for question 12.

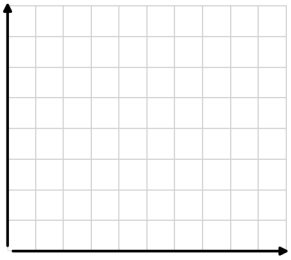

12. Over which intervals is g(x) increasing? Decreasing? Name every relative maximum and relative minimum. (2)

increasing: _____

decreasing: _____

13. A 900-gallon tank drains at a steady rate. It is empty after 30 minutes. Sketch a graph of gallons left (y) vs. minutes (x). Label both intercepts and tell what each one means. (2)

Cumulative Review — ACT Style. Circle the best answer. No work required, but scratch work never hurts.

14. Solve: $2(x - 5) = x + 4$ (1)

A) 9
B) 14
C) −6
D) 1

15. Which is equivalent to $5(x - 2) + 3x$? (1)

E) $8x - 10$
F) $8x - 2$
G) $2x - 10$
H) $8x + 10$
